- 1) Read through the paper carefully.
- 2) What were the parts that you considered to be particularly clear and parts that were not as clear?
- 3) This paper has no table of contents or section headings. What techniques do the authors use to help guide the reader?
- 4) How many revisions of the text do you think were done up to this stage? How many more might be needed? What should the next iteration of revision focus on?
- 5) Which parts were a slower read? Go beyond the difficulty of the content and concentrate on the actual text. Do you have suggestions for easing reading of these parts?
- 6) What language elements are used to refer to the Figures? What about Equations? How are both of these integrated into the text?
- 7) Do you have suggestions for how to improve or reorganize the figures?
