

HOMEWORK 7 PEER REVIEW

Due Monday, November 2 at noon

In class, you received one of your classmate's essays and began the process of peer review. Your assignment this week is to continue marking the paper and provide a thorough and helpful review of the writing. You can find below a rubric we will use to assess your critique.

The final critique with your markings on it should be scanned and submitted to the Stellar website. If you don't have personal access to a scanner, there are scanners available for use in the library.

A	A thorough review with several helpful suggestions (e.g., suggesting major restructuring) and/or probing questions (would this proof work better if...?), and/or appropriate low-level comments (e.g., grammar). Rationales for comments/questions are explained and potential solutions (if any) are suggested.
B	A less thorough review with some helpful comments, but leaving glaring issues unattended or giving non-obvious suggestions without rationale.
C	Few helpful comments.
D	Failed to submit a peer critique.
