

TALK 1

Voice and Body. Talked loud enough? Wrote big enough? Looked at the audience when speaking? Used boards correctly?

Interaction with the audience. Encouraged questions? Attentive to the interrogations of the audience? Made an effort to answer the questions? Adapted the rhythm to the audience?

Structure. The structure of the presentation was clear? I could know what the speaker was aiming for at all time? The structure of the proofs was clear?

Content. The topic was well chosen (interesting, right level of difficulty)? The subject was well motivated (through intro speech, examples, applications)? The main definitions and results were explained clearly, and I will remember them? I learned some new ideas and concepts?

Additional remarks.
